Theme

The theme of the website is about a collection of professional video game equipment. As the team that I support is, I have found it interesting to do it on this subject and accommodate the web page to my liking.

Structure

The structure of the page is a bit simple, it contains a cover with the team logo showing that it is the official website, a beginning with a carousel with different photos and a description about our page and followed the development of the page with the different products that we can find.

Font

The font chosen for my page has been Arial since it is quite easy to see and read

Color

For the cover I have chosen light colors that are consistent with the team's shield and for the rest of the page dark colors with a white background to make it easy to read.
